Part Numbering: A part number is created using the phase designation, followed by a dash, followed by the column length and column id (10.0 mm = 100), followed by a dash, followed by the particle size. Example, ZirChrom-PBD, 10 micron, 150 x 21.2 mm id = ZR03-15212-10.

Non-Porous Zirconia: Columns packed with non-porous zirconia are also available. The beginning of the phase designation changes from ZR to NPZ. Example, non-porous ZirChrom-PBD = NPZ03. Pricing for Non-Porous zirconia columns may be greater than the maximum amount listed above.
